

TURBOCLEANER

PATENTED

GEN

Until recently, transporting potatoes and carrots meant also carrying leftover grubbing soil, as you are most likely aware of!
DEZEURE offers you the perfect answer to this worthless and expensive cargo.

Why do you need to choose for the **TURBOCLEANER** :

One person can transport, clean and over-load crops.

Turbo output: With a cleaning surface of +/- 5m², the TC can ensure both cleaning of the crop and loading lorries in short time. Less than 10 minutes are required to load a full lorry.

Unloading, anywhere at any time: The overload trailer unloads from the back, trailers can be loaded anywhere in the field.

Safe and easy: Due to the **SecuTouch** touch-screen terminal, the TC is safe and easy to use. The SecuTouch terminal will automatically stabilize and level the trailer before operation.

No dirt on the road: The soil is collected in the hydraulically operated soil-collector and can be unloaded evenly at a suitable location in the field.

Centering conveyor: Damaged crops during the loading process are reduced to an absolute minimum thanks to the two optional centering conveyors.

Perfect cleaning: The crop is nicely spread on the cleaning rollers thanks to the steady supply of crops by the discharge floor of the overload trailer.

Modular: The TC is equipped with quick coupler hooks, disconnecting the TC takes less than 15 minutes. This means **maximum usability** of your overload trailer!

Optimal loading space: As the TC also functions as a folding rear tailgate, there is no additional rear overhang.

TECHNICAL SPECIFICATIONS TC

- 12/13 polyurethane spiral coils
Star screen rollers also available.
- Quick change system
- Built-in function to clean the rollers
- Stepless control of speed
- Dosing door for the TC
